A Tutorial on How to use the TDR System for Chi

1. Purpose of the TDR system

The on-line TDR system helps us evaluate our own health condition at any time in any place, according to the Chi concept.

2. The concept of Chi (Qi)

Chi (Qi) is a very important component in Chinese philosophy as well as personal healthcare. According to many researchers, Chi can best be characterized by five factors: Tongue, Fatigue, WeakBreath, Pulse and Sweaty. We should learn what each Chi factor is about. The link below explains the five Chi factors in detail. http://ksiresearchorg.ipage.com/tdr/chiconcept.html

After clicking on the link, explanations are shown below.

3. Exercises

In order to acquire a better understanding about Chi (Qi) and the five Chi factors, you can do some exercises by yourself. Please visit the website below.

http://ksiresearchorg.ipage.com/tdr/learningandanswer.php

(1) you will find a list of questions, only one answer per question, as shown below,

(2) After you have answered all the questions, click on "Show Answers" button under the last question, and the answers will show at the bottom of this page. By comparing your answer with the right answer, you will do better next time.

(3) If you want to do more exercise, click on "Try again" button. Another set of questions will be shown. The picture below shows a new set of questions.

(4) After finishing the introduction about Chi (Qi) and doing more exercises, now you can evaluate your own present condition using the TDR system. That is to say, you can input the five Chi factors score for yourself in TDR system. At the same time, if you are interested in other people's condition, you can also input data for another person. In order to estimate how accurate is your evaluation, click on "learn from master" button, and the results are shown below.

4. How to use the TDR system

(1) User login

Please visit the website, <u>http://ksiresearchorg.ipage.com/chronobot/</u>, after input Email and Password, press "Submit" button.

For example: Email is <u>user1@ksiresearch.org</u>. The results are as follows,

360	安全浏览器 6.3	》 文件 查福	昏 收藏 エ	具帮助 管	– 🗆 X
6	• • • *	Ohttp://ksires	earci 📲 🗲	▼ Q.习近 ²	Q 更多 »
