Model-Driven Development

Automatic Deployment and Monitoring of Software Processes: A Model-Driven Approach (S)
Marília Aranha Freire, Fellipe Araújo Aleixo, Uirá Kulesza, Eduardo Aranha, Roberta Coelho ................................................................. 42

FBDtoVerilog: A Vendor-Independent Translation from FBDs into Verilog Programs (S)
Junbeom Yoo, Jong-Hoon Lee, Sehun Jeong, Sungdeok Cha ................................................ 48

Modeling of Domain-Specific ECA Policies
Raphael Romeikat, Bernhard Bauer, Henning Sanneck ............................................................. 52

A Software Engineering Approach to User-Driven Control of the Microgrid
Mark Allison, Andrew A. Allen, Zhenyu Yang, Peter J. Clarke ............................................. 59

Software Engineering with Computer Intelligence & Machine Learning

A Comparative Study of Different Strategies for Predicting Software Quality
Taghi M. Khoshgoftaar, Kehan Gao, Amri Napolitano ................................................................. 65

Criteria of Human Software Evaluation: Feature Selection Approach
Marek Z. Reformat, Sonal Patel .............................................................................................. 71

A Dual Clustering Approach to the Extract Class Refactoring
Keith Cassell, Peter Andreae, Lindsay Groves ........................................................................... 77

An Empirical Study of Software Metrics Selection Using Support Vector Machine
Huanjing Wang, Taghi M. Khoshgoftaar, Amri Napolitano ......................................................... 83

Software Defect Prediction for High-Dimensional and Class-Imbalanced Data
Kehan Gao, Taghi M. Khoshgoftaar ........................................................................................... 89

BUGMINER: Software Reliability Analysis Via Data Mining of Bug Reports
Leon Wu, Boyi Xie, Gail Kaiser, Rebecca Passonneau ............................................................. 95

Formal Methods

Specification and Runtime Verification of API Constraints on Interacting Objects
Fang Deng, Haiwen Liu, Jin Shao, Qianxiang Wang ................................................................. 101

An Approach For Retrieval and Knowledge Communication Using Medical Documents (S)
Rafael Andrade, Mario Antonio Ribeiro Dantas, Fernando Costa Bertoldi, Aldo von Wangenheim 169

Semantic Web Technologies

A WordNet-based Semantic Similarity Measure Enhanced by Internet-based Knowledge (S)
Gang Liu, Ruili Wang, Jeremy Buckley, Helen M. Zhou .......................................................... 175

Semantic Enabled Sensor Network Design
Jing Sun, Hai H. Wang, Hui Gu ................................................................................................ 179

Using Semantic Annotations for Supporting Requirements Evolution
Bruno Nandolpho Machado, Lucas de Oliveira Arantes, Ricardo de Almeida Falbo .............. 185

Design Software Architecture Models using Ontology (S)
Jing Sun, Hai H. Wang, Tianming Hu .......................................................................................... 191

Software Testing and Debugging

Debug Concern Navigator
Masaru Shiozuka, Naoyasu Ubayashi, Yasutaka Kamei .......................................................... 197

PAFL: Fault Localization via Noise Reduction on Coverage Vector (S)
Lei Zhao, Zhenyu Zhang, Lina Wang, Xiaodan Yin ................................................................. 203

Using Coverage and Reachability Testing to Improve Concurrent Program Testing Quality
Simone R. S. Souza, Paulo S. L. Souza, Mario C. C. Machado, Mário S. Camillo,
Adenilso Simão, Ed Zaluska ........................................................................................................ 207

Program Slicing Spectrum-Based Software Fault Localization
Wanzhi Wen, Bixin Li, Xiaobing Sun, Jiakai Li .......................................................................... 213

Interface Testing Using a Subgraph Splitting Algorithm: A Case Study (S)
Sergiy Vilkomir, Ali Asghary Karahroudy, Nasseh Tabrizi ...................................................... 219

Machine Learning-based Software Testing: Towards a Classification Framework (S)
Mahdi Noorian, Ebrahim Bagheri, Wheichang Du ...................................................................... 225

A Model-based Approach to Regression Testing of Component-based Software
Chuanqi Tao, Bixin Li, Jerry Gao ................................................................................................. 230
Multiple Fault Localization with Data Mining
Peggy Cellier, Mireille Ducassé, Sébastien Ferré, Olivier Ridoux ........................................ 238

Constructing Subtle Concurrency Bugs Using Synchronization-Centric Second-Order Mutation Operators
Leon Wu, Gail Kaiser ........................................................................................................... 244

Automated Software Testing

The ucsCNL: A Controlled Natural Language for Use Case Specifications (S)
Flávia A. Barros, Lais Neves, Érica Hori, Dante Torres ...................................................... 250

A Brief Survey on Automatic Integration Test Order Generation (S)
Zhengshan Wang, Bixin Li, Lulu Wang, Qiao Li ................................................................. 254

Generation of Scripts for Performance Testing Based on UML Models (S)
Maicon B. da Silveira, Elder M. Rodrigues, Avelino F. Zorzo, Leandro T. Costa,
Hugo V. Vieira, Flávio M. de Oliveira ................................................................................ 258

Software Engineering Case Studies and Experience Reports

How IT Professionals Face Negotiations (S)
Sergio Assis Rodrigues, Jano Moreira de Souza ................................................................. 264

Designing a Distributed Systems Architecture Testbed for Real-Time Power Grid Systems (S)
Yan Liu, Ian Gorton, Yousu Chen, Shuangshuang Jin ......................................................... 268

Supporting Software Engineering Education through a Learning Objects and Experience Reports Repository (S)
Rodrigo Santos, Cláudia Werner, Heitor Costa, Simone Vasconcelos ................................. 272

Structuring Software Engineering Case Studies to Cover Multiple Perspectives
Emil Börjesson, Robert Feldt .............................................................................................. 276

Usability Evaluation: A Survey of Software Development Organizations
C. Ardito, P. Buono, D. Caivano, M.F. Costabile, R. Lanzilotti, A. Bruun, J. Stage .............. 282

Maximizing the Financial Benefits Yielded by IT Projects While Ensuring their Strategic Fit
Antonio Juarez Alencar, Gustavo Taveira, Eber Assis Schmitz, Angelica Dias,
Alexandre Correa .............................................................................................................. 288
Embedded, Pervasive, and Ubiquitous Software

Model Checking Framework-based Applications with AspectJ Assistance
Zebin Chen, Stephen Fickas ................................................................. 296

User-defined Scenarios in Ubiquitous Environments: Creation, Execution Control and Sharing
Matthieu Faure, Luc Fabresse, Marianne Huchard, Christelle Urtado, Sylvain Vauvertis ..... 302

SC-xScript: An Embedded Script Language for Scientific Computation in Embedded Systems
Reng Zeng, Yu Huang, Su Liu, Peter J. Clarke, Xudong He, Gwendolyn W. van der Linden,
Jon L. Ebert .......................................................................................... 308

Context-aware Services for Multiple-Users (S)
Ichiro Satoh .......................................................................................... 315

Dynamic Service Choreography using Context Aware Enterprise Service Bus
Swapan Bhattacharya, Jayeeta Chanda, Sabnam Sengupta, Ananya Kanjilal ..................... 319

Software Project Management

Web System to Aid Project Management
Rogéria Cristiane Gratão de Souza, Antonio Marcos Neves Esteca, Adriana Barbosa Santos,
Carlos Roberto Valêncio, Marcelo Takeshi Honda ........................................ 325

A Composite Project Effort Estimation Approach in an Enterprise Software
Development Project (S)
Cagatay Catal, Mehmet S. Aktas ........................................................... 331

Project Risk Management Using Event Calculus (S)
Andreas Gregoriades, Vicky Papadopoulou Lesta, Petros Petrides .............................. 335

The Impact of Software Development Team Dynamics on the Knowledge Management Process (S)
Shuib Basri, Rory V. O’Connor .............................................................. 339

Knowledge Acquisition

Quick Acquisition of Topic-based Information/Knowledge from News Site Databases
Hao Han ............................................................................................... 343
Using Contextual Information to Improve Awareness in Software Development (S)
Bruno Antunes, Joel Cordeiro, Pedro Costa, Paulo Gomes ................................................................. 349

Evaluation of Semi-Automatic Acquisition of Semantic Descriptions of Web Services (S)
Shahab Mokarizadeh, Peep Küngas, Mihhail Matskin ........................................................................ 353

Knowledge Representation and Visualization

A Comparison and Analysis of Some Ontology Visualization Tools
Simon Suigen Guo, Christine W. Chan .................................................................................................. 357

Knowledge Management in Next Generation Networks
Samir Atitallah, Omar Abou Khaled, Maria Sokhn, Elena Mugellini .................................................. 363

A Model for Knowledge Retrieval based on Semantic Images (S)
H. Andres Melgar S., Fabiano D. Beppler, Roberto C.S. Pacheco, Jose L. Todesco .............................. 369

Web and Data Mining

Graph Grammar Based Web Data Extraction
Amin Roudaki, Jun Kong ....................................................................................................................... 373

Cyclic Association Rules: Coupling Dimensions and Measures
Eya Ben Ahmed, Ahlem Nabli, Faïez Gargouri ...................................................................................... 379

Measuring Similarity in Large-scale Folksonomies
Giovanni Quattrone, Emilio Ferrara, Pasquale De Meo, Licia Capra .................................................. 385

Exploiting Semantic Aspects to Evolve A Text-Based Search on A Legacy Document Management System
Johann Grabner, Andreas Mauczka, Mario Bernhart, Thomas Grechenig ........................................... 392

Ontologies and Methodologies

Extracting Ontology Hierarchies From Text (S)
Jone Correia, Rosario Girardi, Carla Faria ............................................................................................. 398

From Glossaries to Ontologies: Disaster Management Domain (S)
Katarina Grolinger, Kevin P. Brown, Miriam A.M. Capretz ................................................................. 402
Packaging Controlled Experiments Using an Evolutionary Approach Based on Ontology (S)
*Lilian Passos Scatalon, Rogério Eduardo Garcia, Ronaldo Celso Messias Correia* ........................ 408

Knowledge Engineering in the domain of Carbon Dioxide Capture Process System
*Q. Zhou, A. J. Wiebe, C. W. Chan* ................................................................................................................................. 414

Software Maintenance and Evolution

Maintainability Predictors for Relational Database-Driven Software Applications: Results from a Survey
*Mehwish Riaz, Emilia Mendes, Ewan Tempero* .................................................................................................................. 420

How Annotations are Used in Java: An Empirical Study
*Henrique Rocha, Marco Tulio Valente* ............................................................................................................................... 426

Automated Extraction of Data Lifecycle Support from Database Applications
*Kaiping Liu, Hee Beng Kuan Tan, Xu Chen, Hongyu Zhang, Bindu Madhavi Padmanabhuni* 432

Measurement & Empirical Software Engineering

An Empirical Study on the Importance of Quality Requirements in Industry
*Jose Luis de la Vara, Krzysztof Wnuk, Richard Berntsson Svensson, Juan Sánchez, Björn Regnell* .......................................................... 438

An Empirical Study on Classification of Non-Functional Requirements
*Wen Zhang, Ye Yang, Qing Wang, Fengdi Shu* ............................................................................................................................ 444

Assessing the Impact of Aspects on Design By Contract Effort: A Quantitative Study
*Henrique Rebêlo, Ricardo Lima, Uirá Kulesza, Cláudio Sant’Anna, Roberta Coelho, Alexandre Mota, Márcio Ribeiro, César A. L. Oliveira* ................................................................................................................................................ 450

Failure Prediction based on Log Files Using the Cox Proportional Hazard Model
*Ilenia Fronza, Alberto Sillitti, Giancarlo Succi, Jelena Vlasenko* ............................................................................................... 456

Causal Networks Based Process Improvement (S)
*D. Günther, R. Neumann, K. Georgieva, R. R. Dumke* ................................................................................................................ 462

Measuring Levels of Abstraction in Software Development (S)
*Frank Tsui, Abdolrashid Gharaat, Sheryl Duggins, Edward Jung* .......................................................................................... 466
Reusing Functional Testing in order to Decrease Performance and Stress Testing Costs (S)
Ismayle de Sousa Santos, Alcemir Rodrigues Santos, Pedro de Alcântara dos S. Neto .......... 470

Empirical Analysis for Investigating the Effect of Control Flow Dependencies on Testability of Classes (S)
Mourad Badri, Fadel Toure ........................................................................................................ 475

Empirical Study Upon Software Testing Learning With Support From Educational Game (S)
Marcello Thiry, Alessandra Zoucas, Antônio C. da Silva .......................................................... 481

A Study on Performance Inconsistency between Estimation by Analogy and Linear Regression (S)
Sousuke Amasaki .......................................................................................................................... 485

Component-Based Software Engineering

Recommending Component by Citation: A Semi-supervised Approach for Determination
Sibo Cai, Yanzhen Zou, Lijie Wang, Bing Xie, Weizhong Shao ................................................. 489

Testing Configurable Component-Based Software - Configuration Test Modeling and Complexity Analysis
Jerry Gao, Jing Guan, Alex Ma, Chuanqi Tao, Xiaoying Bai, David C. Kung ......................... 495

Data Uncertainty Model for Mashup
Xin Gao, Wenhui Hu, Wei Ye, Shi-kun Zhang ........................................................................... 503

Presenting Software License Conflicts through Argumentation
Thomas A. Alspaugh, Hazeline U. Asuncion, Walt Scacchi ...................................................... 509

A Genetic Approach for Software Architecture Recovery from Object-Oriented Code
Abdelhak-Djamel Seriai, Sylvain Chardigny .............................................................................. 515

An Ontology based Method for Building Understandable Hierarchical Classification Structure for Software Assets Browsing (S)
Ge Li, Zhi Jin .................................................................................................................................. 521

Adaptive and Self-Managing Software

Mapping Non-Functional Requirements To Cloud Applications
David Villegas, S. Masoud Sadjadi .............................................................................................. 527
Computational Reflection in order to support Context-Awareness in a Robotics Framework
Sheila Mendez, Francisco Ortin, Miguel Garcia, Vicente García-Díaz ........................................ 533

A Survey of Software Engineering for Self-Organization Systems (S)
Yi Guo, Xinjun Mao, Cuiyun Hu, Junwen Yin, Jiang Cao ............................................................... 539

Self-Management of External Device Failures in Embedded Software Systems
Michael E. Shin, Poonam Mane ........................................................................................................ 543

Towards Modeling and Validating Analysis Processes for Software Adaptation (S)
Xiangping Chen, Gang Huang, Lingshuang Shao ............................................................................ 547

A Reflective Model for Architecting Feedback Control Systems
Filip Křikava, Philippe Collet ........................................................................................................ 553

A Metamodel for Distributed Ensembles of Virtual Appliances
Xabriel J. Collazo-Mojica, S. Masoud Sadjadi .............................................................................. 560

Service-Oriented Architecture

Towards Automated Conformance Checking of ebBP-ST Choreographies and Corresponding WS-BPEL Based Orchestrations
Matthias Geiger, Andreas Schönberger, Guido Wirtz ................................................................. 566

Proactive Problem Management and Event Correlation
Werner Zirkel, Guido Wirtz ........................................................................................................... 572

A Regression Test Technique for Analyzing the Functionalities of Service Composition (S)
Huiqun Yu, Dongmei Liu, Guisheng Fan, Liqiong Chen ............................................................... 578

Agile-Based Software Engineering

A view towards Organizational Learning: An empirical study on Scrum implementation
Viviane Santos, Alfredo Goldman, Ana Carolina M. Shinoda, André L. Fischer ......................... 583

Current State of Reference Architectures in the Context of Agile Methodologies
Vinícius Augusto Tagliatti Zani, Daniel Feitosa, Elisa Yumi Nakagawa ........................................ 590

Neglecting Agile Principles and Practices: A Case Study (S)
Patricia Vilain, Alexandre Jonatan B. Martins ............................................................................... 596
Software Engineering Tools and Environments

Simulations of Risks for Monitoring and Prevention
MariaGrazia Fugini, Filippo Ramoni, Ronald Israels, Claudia Raibulet, Ovidiu Constantin

Flexible Support for Adaptable Software and Systems Engineering Processes (S)
Richard Mordinyi, Thomas Moser, Stefan Biffl, Deepak Dhungana

Automated Detection of Likely Design Flaws in Layered Architectures
Aditya Budi, Lucia, David Lo, Lingxiao Jiang, Shaowei Wang

Software Dependability and Reliability

Exploiting Computational Redundancy for Efficient Recovery from Soft Errors in Sensor Nodes
Aly Farahat, Ali Ebnenasir

A Web Service Reliability Model Based on Birth-Death Process (S)
Chunli Xie, Bixin Li, Xifeng Wang

Architecture-based Reliability Analysis with Uncertain Parameters (S)
Derek Doran, Matthew Tran, Lance Fiondella, Swapna S. Gokhale

Architecture-based Reliability Analysis of Concurrent Software Applications using Stochastic Reward Nets (S)
Rehab El Kharboutly, Swapna S. Gokhale

Software Process Modeling & Maturity

Ensuring Continuous Data Accuracy in AISEMA Systems (S)
Irina Diana Coman, Alberto Sillitti, Giancarlo Succi

Specification and Implementation of SPEM4MDE, a metamodel for MDE software processes
Samba Diaw, Redouane Lbath, Bernard Coulette

Conformance Checking of Software Development Processes Through Process Mining
Artini M. Lemos, Caio C. Sabino, Ricardo M. F. Lima, César A. L. Oliveira

SET-MM – A Software Evaluation Technology Maturity Model (S)
Raúl García-Castro
### Software Security

**A Feature-Based Modeling Approach to Configuring Privacy and Temporality in RBAC**  
*Sangsig Kim, Yen-Ting Lee, Yuanlin Zhu, Dae-Kyoo Kim, Lunjin Lu, Vijayan Sugumaran*  
... 666

**Using Security Patterns to Tailor Software Process**  
*Rosana Wagner, Lisandra Manzoni Fontoura, Adriano Brum Fontoura*  
... 672

**Security Analysis of FileZilla Server Using Threat Models (S)**  
*Michael Sanford, Daniel Woodraska, Dianxiang Xu*  
... 678

**Misuse Patterns for Cloud Computing (S)**  
*Keiko Hashizume, Eduardo B. Fernandez, Nobukazu Yoshioka*  
... 683

### Software Product Lines and Tools

**A Meta-Process to Support Trade-Off Analysis in Software Product Line Architecture**  
*Edson A. Oliveira Junior, Itana M. S. Gimenes, José C. Maldonado*  
... 687

**Design of A UML Profile for Feature Diagrams and Its Tooling Implementation**  
*Thibaut Possompès, Christophe Dony, Marianne Huchard, Chouki Tibermacine*  
... 693

**Software Product Lines System Test Case Tool: A Proposal (S)**  
*Crescencio Rodrigues Lima Neto, Ivan do Carmo Machado, Paulo Anselmo Mota Silveira Neto, Eduardo Santana de Almeida, Silvio Romero de Lemos Meira*  
... 699

**Scalability of Variability Management: An Example of Industrial Practice and Some Improvements (S)**  
*Yinxing Xue, Stan Jarzabek, Pengfei Ye, Xin Peng, Wenyun Zhao*  
... 705

**RiPLE-TE: A Process for Testing Software Product Lines (S)**  
*Ivan do Carmo Machado, Paulo Anselmo da Mota Silveira Neto, Eduardo Santana de Almeida, Silvio Romero de Lemos Meira*  
... 711

**An Agile Scoping Process for Software Product Lines (S)**  
*Marcela Balbino, Eduardo Santana de Almeida, Silvio Meira*  
... 717

**An Approach for Identifying and Implementing Aspectual Features in Software Product Lines (S)**  
*Mohamed A. Zaatar, Haitham S. Hamza, Abd El Fatah Hegazy*  
... 723
Software Requirements Engineering

Automating the Detection of Complex Semantic Conflicts between Software Requirements (An empirical study on requirements conflict analysis with semantic technology)
Thomas Moser, Dietmar Winkler, Matthias Heindl, Stefan Biffl .................................................. 729

A Process Oriented Approach to Model Non-Functional Requirements Proposition
Extending UML (S)
Aneesh Krishna .......................................................................................................................... 736

Use Case Driven Extension of ProjectIT-RSL to Support Behavioral Concerns (S)
David de Almeida Ferreira, Alberto Rodrigues da Silva ................................................................. 740

Applying and Validating a UML Metamodel for the Requirements Analysis in Multi-Agent Systems: The AME-A Case Study (S)
Gilleanes Thorwald Araujo Guedes, Rosa Maria Vicari ................................................................. 746

Software Architecture

A Panorama of Software Architectures in Game Development
Leonardo Bitencourt Morelli, Elisa Yumi Nakagawa ................................................................. 752

Detecting Architecture Erosion by Design Decision of Architectural Pattern
Lei Zhang, Yanchun Sun, Hui Song, Franck Chauvel, Hong Mei .................................................. 758

A Flexible Event-Driven Architecture for Peer-to-Peer Based Applications
Leone Parise Vieira da Silva, Rajiv Geeeverghese, Edward de Oliveira Ribeiro,
Genaina Nunes Rodrigues, Célia Ghedini Ralha ........................................................................ 764

A Formal Approach for Incorporating Architectural Tactics into the Software Architecture
Hamid Bagheri, Kevin Sullivan ................................................................................................. 770

Towards Quality Based Solution Recommendation in Decision-Centric Architecture Design (S)
Lei Zhang, Yanchun Sun, Yuehui Peng, Xiaofeng Cui, Hing Mei .................................................. 776

Representation of Reference Architectures: A Systematic Review (S)
Milena Guessi, Lucas Bueno Ruas Oliveira, Elisa Yumi Nakagawa .............................................. 782
A Model-View-DynamicViewModel and its Performance in a Web-based Component architecture (S)

Graeme Baillie, Brian Armour, Dave Allan, Robert Milne, Thomas M Connolly, Richard Beeby ........................................................................................................................................................................ 786

Analysis of the continuity of software processes execution in software organizations assessed in MPS.BR using Grounded Theory

Carlos Diego Andrade de Almeida, Thiago Crystyan Macedo, Adriano Albuquerque .......... 792

Poster/Demo

BDI Agents to Bridge Cloud Computing and End-Users (Case Study: An Agent-based Personal Trainer to Copd Patients) (P)
Kasper Hallenborg ........................................................................................................................................................................ A-1

Cloud Engineering Approach in Business Innovation (P)
Giorgio Valle, Bruno Apolloni ......................................................................................................................................................... A-3

Software Quality In Terms Of Academic Progress Of Developers (P)
Miriam Vázquez-Escalante, Jose Antonio Flores-Saucedo, Hector Gerardo Perez-Gonzalez, Juan Carlos Cuevas-Tello ......................................................................................................................................................... A-5

Towards a Novel Statistical Method for Generating Test Sets with a Given Coverage Probability (P)
Cristiane Selem Ferreira Neves, Eber Assiz Schmitz, Fábio Protti, Antônio Juarez Alencar A-7

Architecture for Personalized and Semantic Information Retrieval: Approach Based on Content’s Re-indexing Using User’s Profile (P)
Azza Harbaoui, Malek Ghenima, Henda Ben Ghezala, Sahbi Sidhom ........................................... A-9

Author’s Index .................................................................................................................................................................................. A-11

Reviewer’s Index .................................................................................................................................................................................. A-16

Poster/Demo Presenter’s Index ......................................................................................................................................................... A-19

Note: (S) indicates a short paper.
(P) indicates a poster or demo, which is not a refereed paper.
